

Case Study:

Egyptian Medical Union (EMU)

Our collaboration with the Egyptian Medical Union exemplifies our expertise. We replaced fragmented legacy systems with a unified, microservice-based architecture **that included:**

- **Membership Services**
- **Payment Processing**
- **Pension Management**
- **Aid Services**
- **Medical Stamp Services**

✦ Technologies Employed

- **Kafka:** For real-time data streaming.
- **Camunda:** For process orchestration.
- **Drools:** For business rule configuration.
- **Alfresco:** For enterprise content management.

✦ Results Achieved

The tailored solution empowered EMU to:

- **Streamline operations**
- **Enhance transparency**
- **Future-proof its services**

This project illustrates Dirac's ability to transform institutional challenges into robust, adaptable systems, cementing our status as a trusted partner for digital transformation across sectors.
